

UC-604 — Acceptance Evidence

US: US-CLAIM-RENAME — Rename claim -> reservation in Native Backend + Control Panel
UC: UC-604 — Deprecated claim_uc / ALREADY_CLAIMED alias + DeprecationWarning for v5.35-v5.36
Branch: feature/uc-604-deprecated-claim-uc-alias
Date: 2026-05-25

Summary

Introduces the deprecation layer that lets callers migrate from claim_uc to reserve_uc at their own pace during v

- 1. Emits a single DeprecationWarning (stacklevel=2 so the warning points at the caller, not at the wrapper).
- 2. Logs a structured deprecated_tool_called event with tool, since_version, remove_in_version, replacement.
- 3. Returns a payload that carries BOTH vocabularies — reserved_at + claimed_at (same value), code + legacy_code
- 4. Forwards to reserve_uc internally — same business semantics.

The new reserve_uc tool stays clean: no warning, no legacy keys in its payload.

UC-612 will remove the entire deprecation block in v5.37.0.

Files

Path	Change
server/tools/coordination.py	New claim_uc async function + _DEPRECATED_CODE_ALIASES map + _CLAIM_UC
tests/test_deprecated_claim_uc_alias.py	NEW — 10 tests pinning down the deprecation surface: payload enrich

AC-01 PASS

_CLAIM_UC_DEPRECATED_DESCRIPTION starts with the literal:
> [DEPRECATED desde v5.35.0 — usa reserve_uc. Se elimina en v5.37.0]
Asserted by test_claim_uc_deprecated_description_has_literal_prefix. The tool is functionally registered and forward

AC-02 PASS

_add_legacy_aliases() mirrors reserved_at into claimed_at and maps code to legacy_code via:
New code	Legacy code
RESERVED	CLAIMED
ALREADY_RESERVED	ALREADY_CLAIMED

Auth-failure codes (UNAUTHENTICATED, FORBIDDEN, NOT_NATIVE_SESSION) are not rename-specific and pass t

AC-03 PASS

claim_uc emits exactly one DeprecationWarning per call with a message naming claim_uc, v5.35.0, v5.37.0, res

AC-04 PASS

reserve_uc emits zero DeprecationWarning and its payload does not contain claimed_at nor legacy_code. Verifie

Tests

```
$ .venv/bin/pytest tests/test_deprecated_claim_uc_alias.py -v
===== 10 passed in 0.31s =====
```

```
$ SPECBOX_NATIVE_DSN=... .venv/bin/pytest \
    tests/test_native_*.py tests/test_coordination_*.py \
    tests/test_deprecated_claim_uc_alias.py -q
142 passed in 4.43s
```

142 passed (132 base + 10 new UC-604 tests). Zero regressions across the native + coordination suites.

Verdict

All four ACs PASS. UC-604 ready for review.
