

UC-606 — Acceptance Evidence

US: US-CLAIM-RENAME — Rename claim -> reservation in Native Backend + Control Panel
UC: UC-606 — Engine documentation (CLAUDE.md, ENGINE_VERSION.yaml, app_spec.md)
Branch: feature/uc-606-engine-docs
Date: 2026-05-25

Files

Path	Change
CLAUDE.md	H1 bumped to v5.35.0, table row "Claims + branches" -> "Reservations + branches" with mention
ENGINE_VERSION.yaml	version: 5.34.1 -> 5.35.0; codename: "Reservation Rename"; release_date: 2026-05-25
doc/app/app_spec.md	canonical_decisions zone (hybrid, append_only) gains the explicit AC-04 line verbatim

Out-of-scope per the UC description: PRDs/plans in doc/prd/ and doc/plans/ are deliberately NOT rewritten — the

AC-01 PASS — grep is bounded to AC-01-permitted exceptions

```
$ grep -rn 'uc_claims\|claim_uc\|claimed_at\|claims\.py' \
  CLAUDE.md rules/ server/coordination/__init__.py doc/app/
CLAUDE.md:90:| Tools MCP nativas | ... v5.35.0 también registra el alias deprecado `claim_uc` ...
CLAUDE.md:95:códigos `ALREADY_RESERVED` / `NOT_RESERVATION_OWNER`. Las tools MCP `claim_uc` y el ...
doc/app/app_spec.md:73:- **`claim`→`reservation` (v5.35.0)**: renombre del concepto ...
```

All three hits fall into the AC's explicit exception clause:

- CLAUDE.md L90 + L95: the "nota al pie histórica en CLAUDE.md" mentioning claim_uc between backticks as
- doc/app/app_spec.md L73: the "decisión canónica nueva en app_spec.md" that AC-04 mandates.

Zero references in active business code.

AC-02 PASS

CLAUDE.md L92-99 contains the explicit "Nota de vocabulario" paragraph:

> Nota de vocabulario (v5.35.0 — US-CLAIM-RENAME): desde v5.35.0 el concepto antes llamado "claim" se llam

AC-03 PASS

ENGINE_VERSION.yaml:

```
version: 5.35.0
codename: "Reservation Rename"
release_date: 2026-05-25
```

changelog.5.35.0 entry contains:

- summary describing the rename rationale and the deprecation strategy

- 8 changes bullets referencing UC-601 (SQL), UC-602 (module), UC-603 (MCP descriptions + payload guards),
- explicit 100% backwards-compatible during v5.35-v5.36 compatibility note

AC-04 PASS

doc/app/app_spec.md line 73, inside the canonical_decisions hybrid zone (marker <!-- @specbox:zone start kind

> - claim→reservation (v5.35.0): renombre del concepto de coordinación multi-developer del Native Backend; ra

Verbatim match with the AC-04 text.

Verdict

All four ACs PASS. UC-606 ready for review.
