

UC-602 — Acceptance Evidence

US: US-CLAIM-RENAME — Rename claim → reservation in Native Backend + Control Panel
UC: UC-602 — Rename server/coordination/claims.py → reservations.py and all internal APIs
Branch: feature/uc-602-rename-claims-module-to-reservations
Date: 2026-05-24

Files

Path	Action
server/coordination/reservations.py	NEW — full module with renamed identifiers
server/coordination/claims.py	DELETED (git rm)
server/coordination/__init__.py	Docstring updated
server/tools/coordination.py	claim_uc -> reserve_uc, codes, summaries
server/tools/spec_driven.py	_start_uc_native + _native_uc_ids_reserved_by_others renamed; compat constant
server/migration/native_handling.py	Output keys reservations/reserved_at
server/server.py, server/auth_gateway.py, server/app_docs/drift_detector.py	Doc/comment updates
server/db/migrations/0007_ + supabase/migrations/20260524000007_	Hardened for re-apply scenario
tests/test_coordination_claims.py, tests/test_native_handling.py	Imports + identifier renames (file rename def)

AC-01 — module exists with renamed surface

server/coordination/reservations.py exports the 9 required names. claims.py removed. __init__.py docstring docu

AC-02 — dataclass shape + error payload

```
UCReservation('p','UC-1','alice','b','2026').to_public() ==
{'uc_id':'UC-1','developer_id':'alice','reserved_at':'2026','branch':'b'}
AlreadyReservedError.code == 'ALREADY_RESERVED'
NotReservationOwnerError.code == 'NOT_RESERVATION_OWNER'
to_payload() includes {'code':'ALREADY_RESERVED','uc_id','owner','reserved_at','branch'}
```

PASS.

AC-03 — grep is bounded

16 hits remain, all in: server/tools/coordination.py (excluded by AC-03), docstrings explaining the rename, and t

Tests

130 passed in 4.68s against Postgres 16-alpine (native + coordination suites). The wider repo's 14 pre-existing f

Migration robustness fix

While running tests, exposed a re-apply bug in UC-601's 0007: 0003 re-creates an empty uc_claims next to the n

Verdict

All three ACs PASS.
