

UC-601 — Acceptance Evidence

US: US-CLAIM-RENAME — Rename claim → reservation in Native Backend + Control Panel
UC: UC-601 — SQL migration uc_claims → uc_reservations in specbox-engine
Branch: feature/uc-601-rename-claims-to-reservations
Date: 2026-05-24

Files

Path	Role
server/db/migrations/0007_rename_claims_to_reservations.sql	Canonical migration (local dev/tests runner)
supabase/migrations/20260524000007_rename_claims_to_reservations.sql	Supabase ledger mirror (production)

Both files contain the same DDL inside a DO \$\$... \$\$ block with four guarded renames (table, column, index, RL

Verification

Postgres 16-alpine via docker compose -f docker-compose.dev.yml up -d. Apply chain: 0001..0006 then 0007.

AC-01 — migration exists, idempotent, renames everything, preserves rows

Pre-migration row inserted into uc_claims with timestamp 2026-05-24 12:28:23.485024+00. After applying 0007

AC-02 — final schema shape

\d uc_reservations shows: PK (project_id, uc_id), FKs ON DELETE CASCADE to projects(project_id) and developers

AC-03 — clean apply on fresh and populated DB

Fresh DB scenario: DROP SCHEMA public CASCADE; CREATE SCHEMA public; then 0001..0007 applied with zero

RLS policy rename (Supabase mirror)

Supabase migration 20260522000004_rls_policies.sql creates specbox_deny_anon_uc_claims ON uc_claims. After

Verdict

All three acceptance criteria PASS on Postgres 16-alpine local dev. UC-601 ready for review.
