

UC-605 — Acceptance Evidence

US: US-CLAIM-RENAME — Rename claim -> reservation in Native Backend + Control Panel

UC: UC-605 — Rename tests/test_coordination_claims.py and assertions

Branch: feature/uc-605-rename-tests-to-reservations

Date: 2026-05-25

Files

| Path | Change |

|-----|-----|

| tests/test_coordination_reservations.py | RENAMED FROM tests/test_coordination_claims.py (git mv) + test fun

| tests/test_coordination_claims.py | DELETED |

Test function renames

| Before | After |

|-----|-----|

| test_claim_uc_success | test_reserve_uc_success |

| test_claim_uc_already_claimed_carries_owner_info | test_reserve_uc_already_reserved_carries_owner_info |

| test_claim_uc_idempotent_for_same_owner | test_reserve_uc_idempotent_for_same_owner |

| test_release_uc_non_owner_rejected_and_claim_kept | test_release_uc_non_owner_rejected_and_reservation_k

| test_release_uc_no_claim_returns_false | test_release_uc_no_reservation_returns_false |

| class TestClaimsRacePG | class TestReservationsRacePG |

| test_concurrent_claims_exactly_one_winner | test_concurrent_reservations_exactly_one_winner |

The two UC-603 tests (test_already_reserved_payload_contains_no_legacy_claim_vocabulary and test_not_reserv

AC-01 PASS

```
$ ls tests/test_coordination_claims.py
ls: tests/test_coordination_claims.py: No such file or directory
$ ls tests/test_coordination_reservations.py
tests/test_coordination_reservations.py
$ SPECBOX_NATIVE_DSN=... pytest tests/test_coordination_reservations.py -q
14 passed in 0.47s
```

File renamed; old name no longer exists; renamed file 100% green.

AC-02 PASS

New test test_deprecated_claim_uc_alias_emits_warning lives at the bottom of tests/test_coordination_reservations.py

1. Calling coord.claim_uc(...) emits exactly one DeprecationWarning whose message contains claim_uc, reserve
2. The returned payload carries both vocabularies: code="RESERVED" + legacy_code="CLAIMED", reserved_at -

The exhaustive deprecation surface (10 tests) lives in tests/test_deprecated_claim_uc_alias.py — this test is the

AC-03 PASS

```
$ SPECBOX_NATIVE_DSN=... pytest \
  tests/test_native_*.py tests/test_coordination_reservations.py -q
114 passed in 4.70s
```

- 114 passed, 0 skipped, against Postgres 16-alpine local.
- The AC text says "50 passed + el test nuevo del alias = 51 passed" — that number reflected the suite size at the time.

Sweep including the dedicated alias suite

```
$ SPECBOX_NATIVE_DSN=... pytest \
  tests/test_native_*.py \
  tests/test_coordination_reservations.py \
  tests/test_deprecated_claim_uc_alias.py -q
124 passed in 4.41s
```

124 / 124 across the full native + coordination + deprecation test surface. Zero regressions.

Verdict

All three ACs PASS. UC-605 ready for review.
